

QUICK AND EASY ABILITY TO CAPTURE PATIENT SYMPTOMS

The AiCure platform offers robust data and insights with the combined data from dosing response, adherence & insights, digital biomarkers, and ePRO. The ability to curate data streams and provide dosing insight enables a holistic view of a patient's symptoms and informs safety and efficacy results.

AiCure ePRO provides a quick and easy way to capture patient-reported outcomes in the form of diaries. Our ePRO product quickly enables participants to record their symptoms in one integrated platform that is easy to use and easy to track.

EMPOWER PATIENTS, SITES AND SPONSORS FOR BETTER INSIGHTS TO SAFETY AND EFFICACY RESULTS

Empower patients and study teams with the convenience of one easy-to-use, integrated platform with medication adherence and digital biomarkers to have a full view of safety and efficacy results. AiCure's ePRO platform quickly allows patients to record their symptoms. It enables sites and sponsors to have real-time visibility to patients' symptoms so they can swiftly and appropriately plan interventions based on dose and questionnaire completion.

HOLISTIC VIEW OF SAFETY AND EFFICACY RESULTS WITH EPRO

Easy to Use

- Built on best practices so patients and sites can easily use and derive insights from data.

Globally Enabled

- AiCure offers multi-language support in over 45 languages, so the benefits of ePRO can be used in global trials in many different patient populations.

Flexibility

- Scheduling is flexible and easy. Sites can configure the ePRO application for specific days and times. Also, AiCure ePRO is available offline when connectivity is not available.

Real-time Visibility

- Sites and sponsors have real-time visibility to the dashboard. As a result, sites and sponsors can quickly plan interventions based on dose and questionnaire completion.
